

## Self-taught developer

For the past year, I've been devoting my free time to learning through Udemy courses and other literature, I've completed the "Java Programming" course held by the Computer Science Department of the University of Helsinki. My self-taught journey resulted in a several smaller beginner level projects available on my [GitHub](#) and gave me the opportunity to work with several languages:

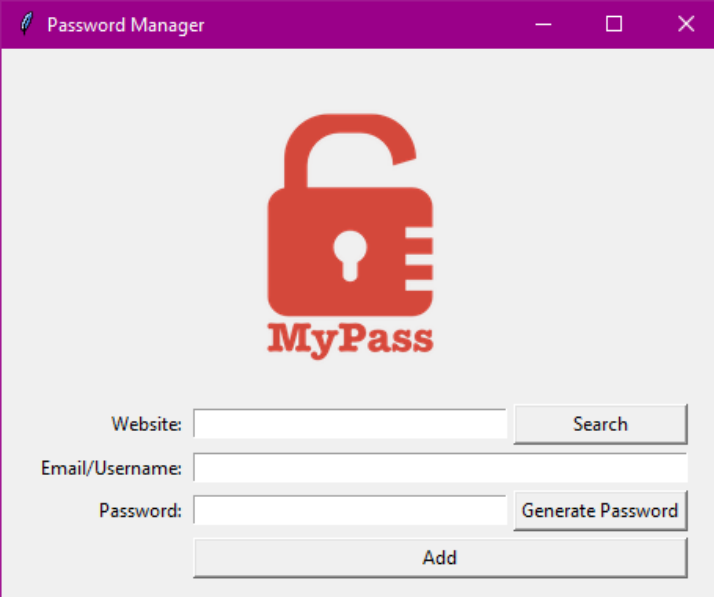

- Python + Flask framework
- Java
- Kotlin + Android studio
- HTML + CSS

## Merchant Navy Officer

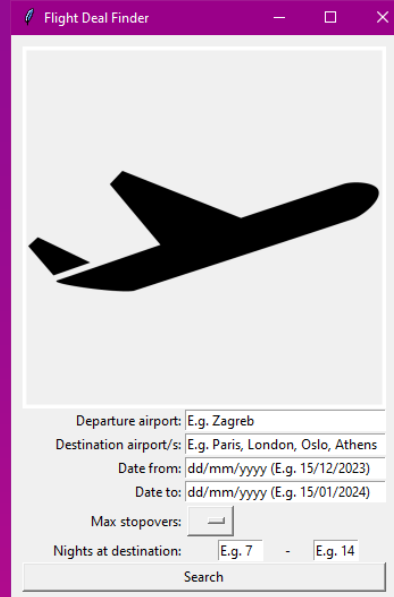

Graduating from the Faculty of Maritime Studies, University of Rijeka I've joined merchant navy in 2018. 5 years of traveling around the globe and serving in the capacity of an officer helped me develop several key qualities:

- Leadership skills
- Problem solving and negotiation
- Showing initiative and being a reliable part of the team
- Working in a multi-cultural environment
- Continuous development and adaptation to new technologies
